Contents Volume 157

1 Editorial: International workshop on smooth and nonsmooth optimization (Rotterdam, July 12–13, 2001)
J. Brinkhuis, T. Illés, H. Frenk, G. Still, G. Weber and T. Terlaky

3 A conceptual method for solving generalized semi-infinite programming problems via global optimization by exact discontinuous penalization
A. Geletu and A. Hoffmann

16 Linear semi-openness and the Lyusternik theorem
H. Pühl and W. Schirotzek

28 On the relation between $\mathcal{U}$-Hessians and second-order epi-derivatives
R. Mifflin and C. Sagastizábal

39 Products of positive forms, linear matrix inequalities, and Hilbert 17th problem for ternary forms
E. de Klerk and D.V. Pasechnik

46 On equivalent results in minimax theory
J.B.G. Frenk, G. Kassay and J. Kolumbán

59 Continuity of minimal points with applications to parametric multiple objective optimization
E.M. Bednarczuk

68 Solving the semismooth equivalence problem
S. Pickl

74 New variants of the criss-cross method for linearly constrained convex quadratic programming
A.A. Akkeleç, L. Balogh and T. Illés

87 A generalized model for data envelopment analysis
Y.B. Yun, H. Nakayama and T. Tanino

106 ε-optimality for multiobjective programming on a Banach space
M.G. Govil and A. Mehra

113 Relationships between vector variational-like inequality and optimization problems
G. Ruiz-Garzón, R. Osuna-Gómez and A. Rufián-Lizana

120 Process investment and loss functions: Models and analysis
S. Kulkarni and V. Prybutok

130 Performance analysis of a GI-Geo-1 buffer with a preemptive resume priority scheduling discipline
J. Walraevens, B. Steyaert and H. Bruneel

152 Post-tax optimization with stochastic programming
M.A. Osorio, N. Gülpınar, B. Rustem and R. Settergren

169 Analysis of the BMAP/G/1 retrial system with search of customers from the orbit
A.N. Dudin, A. Krishnamoorthy, V.C. Joshua and G.V. Tsarenkov

180 Service capacity decision and incentive compatible cost allocation for reporting usage forecasts
S. Radhakrishnan and K.R. Balachandran

196 Customer attrition analysis for financial services using proportional hazard models
D. Van den Poel and B. Larivière

doi:10.1016/S0377-2217(04)00145-6

218 A diffusion approximation model for managing cash in firms: An alternative approach to the Miller–Orr model
I.M. Premachandra
227 Decision-making for stock trading based on trading probability by considering whole market movement
W. Huang, S. Goto and M. Nakamura
242 Modeling undesirable factors in efficiency evaluation: Comment
R. Färe and S. Grosskopf
246 Option strategies with linear programming
C. Papahristodoulou
257 Comments on "Flow shop and open shop scheduling with a critical machine and two operations per job"
G. Mosheiov and U. Yovel
262 Makespan minimization on uniform parallel machines with release times
C. Koulamas and G.J. Kyparisis

267 Local base station assignment with time intervals in mobile computing environments
G.K. Tayi, D.J. Rosenkrantz and S.S. Ravi
286 Two-machine flow shop scheduling with two criteria: Maximum earliness and makespan
B. Toktaş, M. Azizoğlu and S. Kondakcı Köksalan
296 Simultaneous minimization of total completion time and total deviation of job completion times
G. Mosheiov
307 Development and analysis of cost-based dispatching rules for job shop scheduling
M.S. Jayamohan and C. Rajendran
322 Solving the k-cardinality assignment problem by transformation
A. Volgenant
332 Improving activity-based costing heuristics by higher-level cost drivers
C. Homburg
344 Two-warehouse inventory models for deteriorating items with shortages under inflation
H.-L. Yang
357 A production–inventory model for a deteriorating item with trended demand and shortages
S. Sana, S.K. Goyal and K.S. Chaudhuri
372 A game-theoretical cooperative mechanism design for a two-echelon decentralized supply chain
H. Wang, M. Guo and J. Efstathiou
389 Pricing strategy for deteriorating items using quantity discount when demand is price sensitive
P.C. Yang
398 The analytic hierarchy process and multiobjective 0–1 faculty course assignment
M.S. Ozdemir and R.N. Gasimov
409 Redistribution of university budgets with respect to the status quo
A. Tangian
429 Parametric nonlinear programming for analyzing fuzzy queues with finite capacity
S.-P. Chen
439 Mining classification rules using rough sets and neural networks
R. Li and Z.-o. Wang
449 The effect of environmental parameters on product recovery
P. Georgiadis and D. Vlachos
465 An equity check
M.D. Pettypool and P. Karathanos

471 A sequential detection approach to real-time freeway incident detection and characterization
J.-B. Sheu
486 Timing of investments in oligopoly under uncertainty: A framework for numerical analysis
P. Murto, E. Näsäkkälä and J. Keppo
501 Self-organising behaviour in the presence of negative externalities: A conceptual model of commuter choice
A. van Ackere and E.R. Larsen
514 A multiperiod approach to the solution of groundwater management problems using an outer approximation method
A.A. Spiliotopoulos, G.P. Karatzas and G.F. Pinder

527 The sagitta method for solving linear programs
Á. Santos-Palomo
540 Multicomponent efficiency measurement and core business identification in multiplant firms: A DEA model
W.D. Cook and R.H. Green
552 A tabu search algorithm for the open vehicle routing problem
J. Brandão
565 An exact method based on Lagrangian decomposition for the 0–1 quadratic knapsack problem
A. Billionnet and É. Soutif
576 A simple tabu search for warehouse location
L. Michel and P. Van Hentenryck
592 Ant colony optimization algorithm to the inter-cell layout problem in cellular manufacturing
M. Solimanpur, P. Vrat and R. Shankar
607 On the open-shop problem with preemption and minimizing the average completion time
H. Bräsel and H. Hennes
620 Batching decisions for assembly production systems
M.Y. Kovalyov, C.N. Potts and V.A. Strusevich
643 Enhancing a company's profitability and competitiveness using integrated vibration-based maintenance: A case study
B. Al-Najjar and I. Alsyouf
658 A study of defuzzification with experts' knowledge for deteriorating repairable systems
Y.-S. Huang and C.-C. Chang
671 Integrating design and production planning considerations in multi-bay manufacturing facility layout
I. Castillo and B.A. Peters
688 Effective information horizon length in measuring off-line performance of stochastic dynamic systems
A. Herbon, E. Khmelnitsky and O. Maimon
704 Evaluating project completion times when activity times are Weibull distributed
Y.H. Abdelkader
716 Redundancy optimization problems with uncertainty of combining randomness and fuzziness
R. Zhao and B. Liu
736 The heavy-traffic bottleneck phenomenon under splitting and superposition
S. Kim
746 Tabu search algorithms for water network optimization
M. da Conceição Cunha and L. Ribeiro
759 The effect of information streams on capital budgeting decisions
J.J.J. Thijssen, K.J.M. Huisman and P.M. Kort

775 Time restrictions in natural resource management: A dynamic and stochastic analysis
A.A. Batabyal and H. Beladi
784 Scheduling with tool changes to minimize total completion time: Basic results and SPT performance
M. Selim Akturk, J.B. Ghosh and E.D. Gunes
791 Contents Volume 157
